GLOSSARY [View Full Glossary](#)

- Accident Indicator**
 CARFAX receives information about accidents in all 50 states, the District of Columbia and Canada. Various events in a vehicle's history can indicate an accident, such as: salvage auction, fire damage, police-reported accident, crash test vehicle, damage disclosure, collision repair facility and automotive recycler records. Not every accident is reported and not all reported accidents are provided to CARFAX. Details about the accident (e.g. severity, impact location, airbag deployment) vary depending on the source of the accident indicator. CARFAX recommends you obtain a vehicle inspection from your dealer or an independent mechanic.

 - According to the National Safety Council, Injury Facts, 2007 edition, 7% of the 245 million registered vehicles in the U.S. were involved in an accident in 2005. Over 75% of these were considered minor or moderate.
 - CARFAX depends on many sources for its accident data. Each one of these sources has different processing times. CARFAX can only report what is in our database on 09.Sep.2008 03:19:41. New data will result in a change to this report.
- Washington Police Reports:**

 - Provide an estimate of the extent of damage only if the accident resulted in fire damage.
 - Are required if the estimated damage exceeds \$700
 - Are released to CARFAX approximately 3 months after the accident date
- First Owner**
 When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.
- New Owner Reported**
 When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.
- Ownership History**
 CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1994 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.
- Title Issued**
 A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.

New Car Test Drive Review

Category:	Review:
Summary:	<p>On and off the highway, it delivers the best of both worlds. By John Rettie, NewCarTestDrive.com</p> <p>If you enjoy driving, take a test drive in the Subaru Outback. It is much more pleasant for highway use than a sport-utility vehicle. Yet it offers the utility and cargo capacity of similar-sized SUVs. With its all-wheel drive system it has little trouble venturing off the highway.</p>
Overview:	<p>Subaru's Outback Wagon has been redesigned and re-engineered for 2000. The new one is a bit longer and wider than the previous model. A fresh interior is sportier and more conveniently laid out for the driver.</p> <p>Yet the Outback retains its versatility: part sport-utility, part car. Subaru's Outback is a hybrid that handles both on-road and off-road situations with style.</p> <p>It's arguably the best of its type. The Outback provides more power and better handling than the Honda CR-V and Toyota RAV4. It is smoother and more pleasant on the highway than truck-based sport-utility vehicles. A brilliant all-wheel-drive system offers sure-footed traction in all conditions. A generous ground clearance makes it a good vehicle for venturing off paved roads. And there's plenty of cargo space for long treks into the backcountry.</p> <p>The market is flooded with four-wheel-drive sport-utility vehicles. But most are based on trucks and trucks do not make good cars. Compared with cars, they are slow, don't handle as well and are harder to stop. Because of this, industry observers predict future SUVs will be based on cars. Subaru is a forward-thinking company. Several years ago it decided to fit all cars sold in the U.S. with permanent all-wheel drive. The gamble paid off. Subarus have become increasingly popular, even in warmer parts of the country. Not just for snow, Subaru's all-wheel-drive system provides stable handling on wet and dry pavement.</p>
